

Unofficial MusicXML test suite

1 Introduction

Why a MusicXML test suite?

This test suite of sample MusicXML (<http://www.musicxml.org/>) files is supposed to fill a severe gap for all developers implementing MusicXML support in their application: There is no complete test suite of MusicXML files available for testing purposes.

Downloading the test suite

The complete set of MusicXML test files contained in this suite can be downloaded here ([MusicXML-TestSuite-0.1.zip](#)) as a ZIP archive.

License of the test suite

This collection of MusicXML test files is distributed under the MIT license (<http://www.opensource.org/licenses/mit-license.php>), which means that you can use the files for any purpose, as long as you leave the copyright notice (or the LICENSE file) intact.

Connection with LilyPond (<http://www.lilypond.org/>)

At the same time as providing a generic test suite for MusicXML document, this test suite also serves as proofs for the `musicxml2ly` script provided with LilyPond 2.19.30. The images shown in the Chapter 2 [Test cases], page 4 chapter were generated by running `musicxml2ly` and `lilypond` on the MusicXML files. As `musicxml2ly` does not yet perfectly support every single aspect of MusicXML, the output is not supposed to be used as a definitive reference rendering, but rather as an indication how one particular application supports and interprets each of the test files.

If something does not seem right in the output, it might either be that this feature has not been implemented yet, has been wrongly implemented, or a regression has crept in recently...

In the web version of this document, you can click on the file name or figure for each example to see the corresponding `.ly` intermediary file.

Structure of this test suite

Each test file (typically hand-crafted from the MusicXML "specification") checks one particular aspect of MusicXML. A short description of the particular feature for a file is given element inside the file in a comment element of the form:

```
<identification><miscellaneous>
  <miscellaneous-field name="description"> .... </miscellaneous-field>
</miscellaneous></identification>
```

The files are categorized by their first two digits with the following meaning:

- 01-03 ... Basics: Pitches, Rests, Rhythm
- 11-13 ... Staff attributes: Time signatures, Clefs, Key signatures
- 21-24 ... Note settings: Chorded notes, note heads, tuplets, grace notes
- 31-33 ... Notations and articulations: Dynamics (staff-attached), Notations (note-attached), Spanners
- 41-44 ... Parts: Multiple parts, multi-voice parts, multi-staff parts
- 45-46 ... Measure issues and repeats
- 51-52 ... Page issues: Header fields, page layout

- 55-59 ... Exact positioning of items, offsets, etc.
- 61-69 ... Vocal music
- 71-75 ... Instrument-specific: Guitar (Chord, fretboards), Transposing instruments, Percussion, Figured Bass, Others
- 81-89 ... MIDI generation (all sound-related issues)
- 90-99 ... Various Other: Compressed MusicXML files, compatibility with broken MusicXML files exported by other applications

Some of the categories (in particular the exact item positioning and the MIDI generation) don't have any test cases yet.

2 Test cases

01 ... Pitches

All pitches from G to c''' in ascending steps; First without accidentals, then with a sharp and then with a flat accidental. Double alterations and cautionary accidentals are tested at the end.

01a-Pitches-Pitches.xml

Pitches and accidentals

The musical score for 'Pitches and accidentals' is written in treble clef with a common time signature (C). It consists of four staves of music. The first staff starts with a C-clef and contains a series of ascending eighth notes from G4 to c5. The second staff starts with a C-clef and contains a series of ascending eighth notes from G4 to c5, with sharp accidentals for the notes A, B, and C. The third staff starts with a C-clef and contains a series of ascending eighth notes from G4 to c5, with flat accidentals for the notes A, B, and C. The fourth staff starts with a C-clef and contains a series of ascending eighth notes from G4 to c5, with double sharp and double flat accidentals for the notes A, B, and C. The score ends with a double bar line.

All pitch intervals in ascending jump size.

01b-Pitches-Intervals.xml

Various pitches and interval sizes

The musical score for 'Various pitches and interval sizes' is written in treble clef with a 2/4 time signature. It consists of two staves of music. The first staff starts with a C-clef and contains a series of eighth notes with various accidentals (sharp, flat, double sharp, double flat) and interval sizes. The second staff starts with a C-clef and contains a series of eighth notes with various accidentals (sharp, flat, double sharp, double flat) and interval sizes. The score ends with a double bar line.

The <voice> element of notes is optional in MusicXML (although Dolet always writes it out). Here, there is one note with lyrics, but without a voice assigned. It should still be correctly converted.

01c-Pitches-NoVoiceElement.xml

Some microtones: c flat-and-a-half, d half-flat, e half-sharp, f sharp-and-a half. Once in the lower and once in the upper region of the staff.

01d-Pitches-Microtones.xml

Accidentals can be cautionary or editorial. Each measure has a normal accidental, an editorial, a cautionary and an editorial and cautionary accidental.

01e-Pitches-ParenthesizedAccidentals.xml

Microtone accidentals can be cautionary or editorial. Each measure has a normal accidental, an editorial, a cautionary and an editorial and cautionary accidental.

01f-Pitches-ParenthesizedMicrotoneAccidentals.xml

02 ... Rests

All different rest lengths: A two-bar multi-measure rest, a whole rest, a half, etc. until a 128th-rest; Then the same with dotted durations.

02a-Rests-Durations.xml

Rest unit test

Rests can have explicit pitches, where they are displayed. The first rest uses no explicit position and should use the default position, all others are explicitly positioned somewhere else.

02b-Rests-PitchedRests.xml

Four multi-measure rests: 3 measures, 15 measures, 1 measure, and 12 measures.

02c-Rests-MultiMeasureRests.xml

Multi-Measure rests should always be converted into durations that are a multiple of the time signature.

02d-Rests-Multimeasure-TimeSignatures.xml

In some cases, a rest might not have its type attribute set (this happens, for example, with voices in Finale, where you don't manually insert a rest).

02e-Rests-NoType.xml

03 ... Rhythm

All note durations, from long, brevis, whole until 128th; First with their plain values, then dotted and finally doubly-dotted.

03a-Rhythm-Durations.xml

Two voices with a backup, that does not jump to the beginning for the measure for voice 2, but somewhere in the middle. Voice 2 thus won't have any notes or rests for the first beat of the measures.

03b-Rhythm-Backup.xml

Although uncommon, the divisions of a quarter note can change somewhere in the middle of a MusicXML file. Here, the first half measure uses a division of 1, which then changes to 8 in the middle of the first measure and to 38 in the middle of the second measure.

03c-Rhythm-DivisionChange.xml

Several durations can be written with dots. For multimeasure rests, we can also have durations that cannot be expressed with dotted notes (like 5/8).

03d-Rhythm-DottedDurations-Factors.xml

11 ... Time signatures

Various time signatures: 2/2 (alla breve), 4/4 (C), 2/2, 3/2, 2/4, 3/4, 4/4, 5/4, 3/8, 6/8, 12/8

11a-TimeSignatures.xml

A score without a time signature (but with a key and clefs)

11b-TimeSignatures-NoTime.xml

Compound time signatures with same denominator: $(3+2)/8$ and $(5+3+1)/4$.

11c-TimeSignatures-CompoundSimple.xml

Compound time signatures with separate fractions displayed: $3/8+2/8+3/4$ and $5/2+1/8$.

11d-TimeSignatures-CompoundMultiple.xml

Compound time signatures of mixed type: $(3+2)/8+3/4$.

11e-TimeSignatures-CompoundMixed.xml

A time signature of 3/8 with the symbol="cut" attribute and two symbol="single-number" attributes with compound time signatures. Shall the symbol be ignored in this case?

11f-TimeSignatures-SymbolMeaning.xml

Time signature displayed as a single number.

11g-TimeSignatures-SingleNumber.xml

Senza-misura time signature

11h-TimeSignatures-SenzaMisura.xml

12 ... Clefs

Various clefs: G, C, F, percussion, TAB and none; some are also possible with transposition and on other staff lines than their default (e.g. soprano/alto/tenor/baritone C clefs); Each measure shows a different clef (measure 17 has the "none" clef), only measure 18 has the same treble clef as measure 1.

12a-Clefs.xml

A score without any key or clef defined. The default (4/4 in treble clef) should be used.

12b-Clefs-NoKeyOrClef.xml

13 ... Key signatures

Various key signature: from 11 flats to 11 sharps (each one first one measure in major, then one measure in minor)

13a-KeySignatures.xml

Different Key signatures

The image displays 13 staves of musical notation, each representing a different key signature. The notation is in treble clef and 2/4 time. The first seven staves (measures 1-35) show key signatures with 11 flats, 10 flats, 9 flats, 8 flats, 7 flats, 6 flats, and 5 flats. The next six staves (measures 36-48) show key signatures with 4 sharps, 5 sharps, 6 sharps, 7 sharps, 8 sharps, and 9 sharps. The final staff (measures 49-51) shows a key signature with 10 sharps. Each staff begins with a key signature change and is followed by a series of notes and rests.

All different modes: major, minor, ionian, dorian, phrygian, lydian, mixolydian, aeolian, and locrian; All modes are given with 2 sharps.

13b-KeySignatures-ChurchModes.xml

The image displays a single staff of musical notation in treble clef and common time (C). The notation shows 13 measures, each representing a different church mode. The key signature is 2 sharps (F# and C#). The modes are: major, minor, ionian, dorian, phrygian, lydian, mixolydian, aeolian, and locrian. Each mode is represented by a sequence of notes and rests.

major minor ionian dorian phrygian lydian mixolydian aeolian locrian

Non-traditional key signatures, where each alteration is separately given. Here we have (f sharp, a flat, b flat) and (c flatflat, g sharp sharp, d flat, b sharp, f natural), where in the second case an explicit octave is given for each alteration.

13c-KeySignatures-NonTraditional.xml

Non-traditional key signatures with microtone alterations: (g flat-and-a-half, a flat, b half-flat, c natural, d half-sharp, e sharp, f sharp-and-a-half).

13d-KeySignatures-Microtones.xml

14 ... Staff attributes

The number of staff lines can be modified by using the staff-lines child of the staff-details attribute. This can happen globally (the first staff has one line globally) or during the part at the beginning of a measure and even inside a measure (the second part has 5 lines initially, 4 at the beginning of the second measure, and 3 starting in the middle of the third measure).

14a-StaffDetails-LineChanges.xml

21 ... Chorded notes

One simple chord consisting of two notes.

21a-Chord-Basic.xml

Some subsequent (identical) two-note chords.

21b-Chords-TwoNotes.xml

Some three-note chords, with various durations.

21c-Chords-ThreeNotesDuration.xml

Chords in the second measure, after several ornaments in the first measure and a p at the beginning of the second measure.

21d-Chords-SchubertStabatMater.xml

Check for proper chord detection after a pickup measure (i.e. the first beat of the measure is not aligned with multiples of the time signature)!

21e-Chords-PickupMeasures.xml

Between the individual notes of a chord there can be direction or harmony elements, which should be properly assigned to the chord (or the position of the chord).

21f-Chord-ElementInBetween.xml

22 ... Note settings, heads, etc.

Different note styles, using the <notehead> element. First, each note head style is printed with four quarter notes, two with filled heads, two with unfilled heads, where first the stem is up and then the stem is down. After that, each note head style is printed with a half note (should have an unfilled head by default). Finally, the Aiken note head styles are tested, once with stem up and once with stem down.

22a-Noteheads.xml

12

back slashed normal cluster none slash triangle diamond square

18

cross x circle-x inverted triangle arrow down arrow up slashed back slashed

22

normal cluster do re mi fa so

28

la ti do re mi fa so la ti do do re mi fa so la ti do

Staff-connected note styles: slash notation, hidden notes (with and without hidden staff lines)

22b-Staff-Notestyles.xml

slash, no stem slash, with stem normal settings restored

Different note styles for individual notes inside a chord, using the <notehead> element.

22c-Noteheads-Chords.xml

normal cross inverted triangle slashed

Parenthesized note heads. First, a single parenthesized note is tested, once with a normal and then with a non-standard notehead, then two chords with some/all parenthesized noteheads and finally a parenthesized rest.

22d-Parenthesized-Noteheads.xml

23 ... Triplets, Tuplets

Some tuplets (3:2, 3:2, 3:2, 4:2, 4:1, 7:3, 6:2) with the default tuplet bracket displaying the number of actual notes played. The second tuplet does not have a number attribute set.

23a-Tuplets.xml

Different tuplet styles: default, none, x:y, x:y-note; Each with bracket, slur and none. Finally, non-standard 4:3 and 17:2 tuplets are given.

23b-Tuplets-Styles.xml

Displaying tuplet note types, that might not coincide with the displayed note. The first two tuplets take the type from the note, the second two from the <time-modification> element, the remaining pair of tuplets from the <tuplet> notation element. The tuplets in measure 3 specify both a number of notes and a type inside the <tuplet-actual> and <tuplet-normal> elements, the ones in measure 4 specify only a note type (but no number), and the ones in measure 5 specify only a number of tuplet-notes (but no type, which is deduced from the note's type). The first tuplet of measures 3-5 uses 'display-type="actual"', the second one 'display-type="both"'. FIXME: The tuplet-normal should coincide with the real notes!

23c-Tuplet-Display-NonStandard.xml

Tuplets can be nested. Here there is a 5:2 tuplet inside a 3:2 tuple (all consisting of written eighth notes).

23d-Tuplets-Nested.xml

Tremolo tuplets are tuplets on single notes with a tremolo ornament. The application shall correctly import these notes with 2/3 or their time...

23e-Tuplets-Tremolo.xml

Some "triplets" on the end of the first and in the second staff, using only <time-modification>, but not explicit tuplet bracket. Thus, the duration of the notes in the second staff should be scaled properly in comparison to staff 1, but no visual indication about the triplets is given.

23f-Tuplets-DurationButNoBracket.xml

A grace note on a different staff than the actual note.

24e-GraceNote-StaffChange.xml

A grace note with a slur to the actual note. This can be interpreted as acciaccatura or appoggiatura, depending on the existence of a slash.

24f-GraceNote-Slur.xml

31 ... Dynamics and other single symbols

All <direction> elements defined in MusicXML. The lyrics for each note describes the direction element assigned to that note.

31a-Directions.xml

MusicXML directions (attached to sta)

The image displays three musical staves illustrating various MusicXML direction elements and their corresponding lyrics. The first staff shows a single note with a box direction 'A' and a circle direction 'Crc'. The second staff shows a sequence of notes with various dynamic markings (p, pp, ppp, pppp, ppppp, pppppp, f, ff) and articulation symbols (Segno, Coda, Words, Eyegl.). The third staff shows a sequence of notes with various dynamic markings (fff, fffff, mp, mf, sf, sfp, sfpp, fp, rf, rfz, sfz, sffz, fz, abc-ffz) and articulation symbols (f, mp, mf, sf, sfp, sfpp, fp, rf, rfz, sfz, s, z, fz, abc-, z (oth.)).

Staff 1: reh.A (def=sq.) reh.B (none) reh.Test (sq.) reh.Crc (crc.)

Staff 2: Segno Coda Words Eyegl. p pp ppp pppp ppppp pppppp f ff

Staff 3: fff fffff mp mf sf sfp sfpp fp rf rfz sfz sffz fz abc-ffz
 f f mp mf sf sfp sfpp fp rf rfz sfz s z fz abc- z (oth.)

Text markup: different font sizes, weights and colors.

32b-Articulations-Texts.xml

Normal, Small
 Normal, Large
 Normal, Medium
 Bold, Medium
 Bold, Large
 Bold, Small
 Normal, Small, Colored, Below

It should not make any difference whether two articulations are given inside two different notation elements, inside two different articulations children of the same notation element or inside the same articulations element. Thus, all three notes should have a staccato and an accent.

32c-MultipleNotationChildren.xml

Different Arpeggio directions (normal, up, down, non-arpeggiate)

32d-Arpeggio.xml

33 ... Spanners

Several spanners defined in MusicXML: tuplet, slur (solid, dashed), tie, wedge (cresc, dim), tr + wavy-line, single-note trill spanner, octave-shift (8va,15mb), bracket (solid down/down, dashed down/down, solid none/down, dashed none/up, solid none/none), dashes, glissando (wavy), bend-alter, slide (solid), grouping, two-note tremolo, hammer-on, pull-off, pedal (down, change, up).

33a-Spanners.xml

Two simple tied whole notes

33b-Spanners-Tie.xml

A note can be the end of one slur and the start of a new slur. Also, in MusicXML, nested slurs are possible like in the second measure where one slur goes over all four notes, and another slur goes from the second to the third note.

33c-Spanners-Slurs.xml

All types of octave shifts (15ma, 15mb, 8va, 8vb)

33d-Spanners-OctaveShifts.xml

Invalid octave-shifts: 27 down, 11 up.

33e-Spanners-OctaveShifts-InvalidSize.xml

A trill spanner that spans a grace note and ends on an after-grace note at the end of the measure.

33f-Trill-EndingOnGraceNote.xml

Slurs on chorded notes: Only the first note of the chord should get the slur notation. Some applications print out the slur for all notes – these should be ignored.

33g-Slur-ChordedNotes.xml

All different types of glissando defined in MusicXML

33h-Spanners-Glissando.xml

normal glissando solid (+text) dashed dotted wavy normal slide

Several ties that have their end tag missing.

33i-Ties-NotEnded.xml

41 ... Multiple parts (staves)

A piece with four parts (P0, P1, P2, P3; different from what Finale creates!). Are they converted in the correct order?

41a-MultiParts-Partorder.xml

A piece with 20 parts to check whether an application supports that many parts and whether they are correctly sorted.

P0

P1

P2

P3

P4

P5

P7

P8

P9

P10

P11

P12

P13

P14

P15

P16

P17

P18

P19

A huge orchestra score with 28 parts and different kinds of nested bracketed groups. Each part/group is assigned a name and an abbreviation to be shown before the staff. Also, most of the groups show unbroken barlines, while the barlines are broken between the groups.

Piccolo
 Flute 1
 Flute 2
 Oboe
 Oboe through English Horn
 Clarinet in Eb
 Clarinet in Bb 1
 Clarinet in Bb 2
 Bass Clarinet
 Bassoon 1
 Bassoon 2
 Contrabassoon
 Horn in F 1
 Horn in F 2
 Trumpet in C 1
 Trumpet in C 2
 Trombone 1
 Trombone 2
 Tuba
 Timpani
 Percussion
 Harp
 Piano
 Violin I
 Violin II
 Viola
 Cello
 Contrabass

Two properly nested part groups: One group (with a square bracket) goes from staff 2 to 4) and another group (with a curly bracket) goes from staff 3 to 4.

41d-StaffGroups-Nested.xml

Part names and abbreviations can contain line breaks.

41e-StaffGroups-InstrumentNames-Linebroken.xml

MusicXML allows for overlapping part-groups, while many applications do not allow overlapping groups, but require them to be properly nested. In this case, one group (within parenthesis) goes from staff 1 to 4 and another group (also within parenthesis) goes from staff 3 to 5.

41f-StaffGroups-Overlapping.xml

The image shows a musical score with five staves. The first two staves are grouped together with a bracket labeled 'Group 1'. The next two staves are grouped together with a bracket labeled 'Group 2'. The fifth staff is not part of either group. Each staff contains a single note (a half note) followed by a rest (a half note). The notes are all on the same pitch (middle C).

A part with no id attribute. Since this piece has only one part, it is clear which part is described by the one part element.

41g-PartNoId.xml

This piece has more part elements than the part-list section gives. One can either convert all the parts present, but not listed in the part-list, or simply not import / ignore them.

41h-TooManyParts.xml

The image shows a single musical staff with a treble clef. It contains a single note (a half note) followed by a rest (a half note). The note is on the middle C line.

MusicXML allows part-name and part-name-display in the score-part element. If part-name-display is given, it overrides the part-name for display.

The first staff uses only part-name, while the second one (same part-name) overrides it with a custom text. Similar for the part-abbreviation used in subsequent staves.

41i-PartNameDisplay-Override.xml

The image shows four musical staves, each with a treble clef. The first staff is labeled 'Part name' and contains a single note (a half note) followed by a rest (a half note). The second staff is labeled 'Overridden Part Name' and contains a single note (a half note) followed by a rest (a half note). The third staff is labeled 'abbrv.' and contains a single note (a half note) followed by a rest (a half note). The fourth staff is labeled 'Overr.abbrv.' and contains a single note (a half note) followed by a rest (a half note). The notes are all on the same pitch (middle C).

42 ... Multiple voices per staff

Two voices share one staff. Each voice is assigned some lyrics.

42a-MultiVoice-TwoVoicesOnStaff-Lyrics.xml

A multi-voice / multi-staff part with a clef change in the middle of a measure and a <backward> for voice 2 jumping back beyond that clef change.

42b-MultiVoice-MidMeasureClefChange.xml

43 ... One part on multiple staves

A simple piano staff

43a-PianoStaff.xml

A piano staff with different keys and clefs for each of its staves. The keys and clefs for both staves are given at the very beginning of the measure.

43b-MultiStaff-DifferentKeys.xml

A piano staff with different keys and clefs for each of its staves. The key and clef for the second staff is given only after a backward, just before the first note of the second staff is given, but after the whole measure for staff 1 has been given.

43c-MultiStaff-DifferentKeysAfterBackup.xml

Staff changes in a piano staff. The voice from the second staff has some notes/chords on the first staff. The final two chords have some notes on the first, some on the second staff.

43d-MultiStaff-StaffChange.xml

A piano staff with dynamics and clef changes, where each element (ffff, wedge and clef changes) applies only to one voice or one staff, respectively.

43e-Multistaff-ClefDynamics.xml

45 ... Repeats

A simple, repeated measure (repeated 5 times)

45a-SimpleRepeat.xml

A simple repeat with two alternative endings (volta brackets).

45b-RepeatWithAlternatives.xml

Repeats can also be nested.

45c-RepeatMultipleTimes.xml

Nested repeats, each with alternative endings.

45d-Repeats-Nested-Alternatives.xml

Some more nested repeats with alternatives. The barline between measure 7 and 8 will probably be messed up! (Should be a repeat on both sides!)

45e-Repeats-Nested-Alternatives.xml

Some more nested repeats with alternatives, where the MusicXML file does not make sense in the first place. How well are applications able to cope with improper repeats and alternatives?

45f-Repeats-InvalidEndings.xml

A forward-repeating bar line without an ending repeat bar.

45g-Repeats-NotEnded.xml

46 ... Barlines, Measures

Different types of (non-repeat) barlines: default (no setting), regular, dotted, dashed, heavy, light-light, light-heavy, heavy-light, heavy-heavy, tick, short, none.

46a-Barlines.xml

Barlines can appear at mid-measure positions, without using an implicit measure!

46b-MidmeasureBarline.xml

A clef change in the middle of a measure, using either an implicit measure or simply placing the attributes in the middle of the measure.

46c-Midmeasure-Clef.xml

A 3/8 pickup measure, a measure that is split into one (incomplete, only 2/4) measure and an implicit measure, and an incomplete measure (containing 3/4).

46d-PickupMeasure-ImplicitMeasures.xml

Voice 2 should start at 2nd beat of first full measure.

46e-PickupMeasure-SecondVoiceStartsLater.xml

Measures can contain less notes than the time signature says. Here, the first and third measures contain only two quarters instead of four.

46f-IncompleteMeasures.xml

Pickup measure with chord names and figured bass.

46g-PickupMeasure-Chordnames-FiguredBass.xml

51 ... Header information

Several header fields and part names can contain quotes ("). This test checks whether they are converted/imported without problems (i.e. whether they are correctly escaped when converting).

51b-Header-Quotes.xml

"Quotes" in header fields

Some "Tester" Name

There can be multiple <rights> tags in the identification element of the score. The conversion shall still work, ideally using both of them.

51c-MultipleRights.xml

A piece with an empty (but existing) work-title, but a non-empty movement-title. In this case the movement-title should be chosen, even though the work-title exists.

51d-EmptyTitle.xml

Empty work-title, non-empty movement-title

52 ... Page layout

Several page layout settings: paper size, margins, system margins and distances, different fonts, etc.

52a-PageLayout.xml

Layout options

System and page breaks, given in a <print> element

52b-Breaks.xml

61 ... Lyrics

Some notes with simple lyrics: Syllables, notes without a syllable, syllable spanners.

61a-Lyrics.xml

Multiple (simple) lyrics. The order of the exported stanzas is relevant (identified by the number attribute in this test case)

61b-MultipleLyrics.xml

Lyrics assigned to the voices of a piano staff containing two simple staves. Each staff is assigned exactly one lyrics line.

61c-Lyrics-Pianostaff.xml

How to treat lyrics and slurred notes. Normally, a slurred group of notes is assigned only one lyrics syllable.

61d-Lyrics-Melisma.xml

Assigning lyrics to chorded notes.

61e-Lyrics-Chords.xml

Grace notes shall not mess up the lyrics, and they shall not be assigned a syllable.

Ly - rics on notes ____with

Lyrics spanners: continued syllables and extenders, possibly spanning multiple notes. The intermediate notes do not have any <lyric> element.

A _ b - CC _ e _

A normal staff with several (complex) chord names displayed.

C C^{lyd} B^{7 #5 #9} E^{b sus2} G D[#] A^{o7} A^{#5}

C C^{lyd} B⁷ #5 #9 E^b_{sus2} G D[#] A^{o7} C

$E_b m^9$
 $C D^7 Cm^7 11$

The first system of musical notation consists of a grand staff with a treble and bass clef, both in common time (C). The treble staff contains a melody of quarter notes: C4, D4, E♭4, F4, G4, A4, B♭4, and C5. The bass staff contains a bass line of quarter notes: C3, D3, E♭3, F3, G3, A3, B♭3, and C4. Above the treble staff, there are four chord diagrams. The first diagram is for E♭m⁹, showing notes E♭, G, B♭, D, F, and A on a six-string guitar fretboard. The second diagram is for C D⁷, showing notes C, D, E, F, G, and A. The third diagram is for Cm⁷, showing notes C, E♭, F, and G. The fourth diagram is for Cm⁷ 11, showing notes C, E♭, F, G, A, and B. Above the bass staff, there are four chord diagrams. The first diagram is for C, showing notes C, E, and G. The second diagram is for D⁷, showing notes D, F, A, and C. The third diagram is for Cm⁷, showing notes C, E♭, F, and G. The fourth diagram is for Cm⁷ 11, showing notes C, E♭, F, G, A, and B.

Some tablature staves, with explicit fingering information and different string tunings given in the MusicXML file.

71e-TabStaves.xml

All chord types defined in MusicXML. The staff will only contain one c' note (NO chord) for all of them, but the chord names should be properly printed.

71f-AllChordTypes.xml

72 ... Transposing instruments

Transposing instruments: Trumpet in Bb, Horn in Eb, Piano; All of them show the C major scale (the trumpet with 2 sharp, the horn with 3 sharp).

72a-TransposingInstruments.xml

Trumpet in Bb

Horn in Eb

Piano

Various transposition. Each part plays a c'', just displayed in different display pitches. The second-to-last staff uses a transposition where the displayed c' is an actual f''' concert pitch. The final staff is an untransposed instrument.

72b-TransposingInstruments-Full.xml

The image shows a musical score for ten staves, each representing a different instrument. Each staff contains a single whole note C, transposed to the instrument's key signature. The instruments and their key signatures are: Clarinet in Eb (three sharps), Clarinet in Bb (three sharps), Clarinet in A (one flat), Horn in F (two sharps), Horn in Eb (three sharps), Piccolo Trumpet in A (one flat), Trumpet in Bb (three sharps), Trumpet in C (one sharp), Trumpet in D (one flat), and a staff labeled 'displayed c' = s''' (eight sharps). The final staff is an untransposed instrument (one sharp).

An instrument change from one transposition (Clarinet in Eb) to another transposing instrument (Clarinet in Bb). The displayed instrument name should also be updated.

The whole piece is in Bb major (sounding), so first the key signature should be one flat, after the change it should have no accidentals.

72c-TransposingInstruments-Change.xml

The image shows a musical score for a Clarinet in Eb. The first staff has a key signature of one sharp (F#) and contains a whole note C. The second staff has a key signature of one flat (Bb) and contains a whole note C. The third staff has a key signature of one flat (Bb) and contains a whole note C. The fourth staff has a key signature of one flat (Bb) and contains a whole note C. The fifth staff has a key signature of one flat (Bb) and contains a whole note C. The sixth staff has a key signature of one flat (Bb) and contains a whole note C. The seventh staff has a key signature of one flat (Bb) and contains a whole note C. The eighth staff has a key signature of one flat (Bb) and contains a whole note C. The ninth staff has a key signature of one flat (Bb) and contains a whole note C. The tenth staff has a key signature of one flat (Bb) and contains a whole note C. The eleventh staff has a key signature of one flat (Bb) and contains a whole note C. The twelfth staff has a key signature of one flat (Bb) and contains a whole note C. The thirteenth staff has a key signature of one flat (Bb) and contains a whole note C. The fourteenth staff has a key signature of one flat (Bb) and contains a whole note C. The fifteenth staff has a key signature of one flat (Bb) and contains a whole note C. The sixteenth staff has a key signature of one flat (Bb) and contains a whole note C. The seventeenth staff has a key signature of one flat (Bb) and contains a whole note C. The eighteenth staff has a key signature of one flat (Bb) and contains a whole note C. The nineteenth staff has a key signature of one flat (Bb) and contains a whole note C. The twentieth staff has a key signature of one flat (Bb) and contains a whole note C. The twenty-first staff has a key signature of one flat (Bb) and contains a whole note C. The twenty-second staff has a key signature of one flat (Bb) and contains a whole note C. The twenty-third staff has a key signature of one flat (Bb) and contains a whole note C. The twenty-fourth staff has a key signature of one flat (Bb) and contains a whole note C. The twenty-fifth staff has a key signature of one flat (Bb) and contains a whole note C. The twenty-sixth staff has a key signature of one flat (Bb) and contains a whole note C. The twenty-seventh staff has a key signature of one flat (Bb) and contains a whole note C. The twenty-eighth staff has a key signature of one flat (Bb) and contains a whole note C. The twenty-ninth staff has a key signature of one flat (Bb) and contains a whole note C. The thirtieth staff has a key signature of one flat (Bb) and contains a whole note C. The thirty-first staff has a key signature of one flat (Bb) and contains a whole note C. The thirty-second staff has a key signature of one flat (Bb) and contains a whole note C. The thirty-third staff has a key signature of one flat (Bb) and contains a whole note C. The thirty-fourth staff has a key signature of one flat (Bb) and contains a whole note C. The thirty-fifth staff has a key signature of one flat (Bb) and contains a whole note C. The thirty-sixth staff has a key signature of one flat (Bb) and contains a whole note C. The thirty-seventh staff has a key signature of one flat (Bb) and contains a whole note C. The thirty-eighth staff has a key signature of one flat (Bb) and contains a whole note C. The thirty-ninth staff has a key signature of one flat (Bb) and contains a whole note C. The fortieth staff has a key signature of one flat (Bb) and contains a whole note C. The forty-first staff has a key signature of one flat (Bb) and contains a whole note C. The forty-second staff has a key signature of one flat (Bb) and contains a whole note C. The forty-third staff has a key signature of one flat (Bb) and contains a whole note C. The forty-fourth staff has a key signature of one flat (Bb) and contains a whole note C. The forty-fifth staff has a key signature of one flat (Bb) and contains a whole note C. The forty-sixth staff has a key signature of one flat (Bb) and contains a whole note C. The forty-seventh staff has a key signature of one flat (Bb) and contains a whole note C. The forty-eighth staff has a key signature of one flat (Bb) and contains a whole note C. The forty-ninth staff has a key signature of one flat (Bb) and contains a whole note C. The fiftieth staff has a key signature of one flat (Bb) and contains a whole note C. The fifty-first staff has a key signature of one flat (Bb) and contains a whole note C. The fifty-second staff has a key signature of one flat (Bb) and contains a whole note C. The fifty-third staff has a key signature of one flat (Bb) and contains a whole note C. The fifty-fourth staff has a key signature of one flat (Bb) and contains a whole note C. The fifty-fifth staff has a key signature of one flat (Bb) and contains a whole note C. The fifty-sixth staff has a key signature of one flat (Bb) and contains a whole note C. The fifty-seventh staff has a key signature of one flat (Bb) and contains a whole note C. The fifty-eighth staff has a key signature of one flat (Bb) and contains a whole note C. The fifty-ninth staff has a key signature of one flat (Bb) and contains a whole note C. The sixtieth staff has a key signature of one flat (Bb) and contains a whole note C. The sixty-first staff has a key signature of one flat (Bb) and contains a whole note C. The sixty-second staff has a key signature of one flat (Bb) and contains a whole note C. The sixty-third staff has a key signature of one flat (Bb) and contains a whole note C. The sixty-fourth staff has a key signature of one flat (Bb) and contains a whole note C. The sixty-fifth staff has a key signature of one flat (Bb) and contains a whole note C. The sixty-sixth staff has a key signature of one flat (Bb) and contains a whole note C. The sixty-seventh staff has a key signature of one flat (Bb) and contains a whole note C. The sixty-eighth staff has a key signature of one flat (Bb) and contains a whole note C. The sixty-ninth staff has a key signature of one flat (Bb) and contains a whole note C. The seventieth staff has a key signature of one flat (Bb) and contains a whole note C. The seventy-first staff has a key signature of one flat (Bb) and contains a whole note C. The seventy-second staff has a key signature of one flat (Bb) and contains a whole note C. The seventy-third staff has a key signature of one flat (Bb) and contains a whole note C. The seventy-fourth staff has a key signature of one flat (Bb) and contains a whole note C. The seventy-fifth staff has a key signature of one flat (Bb) and contains a whole note C. The seventy-sixth staff has a key signature of one flat (Bb) and contains a whole note C. The seventy-seventh staff has a key signature of one flat (Bb) and contains a whole note C. The seventy-eighth staff has a key signature of one flat (Bb) and contains a whole note C. The seventy-ninth staff has a key signature of one flat (Bb) and contains a whole note C. The eightieth staff has a key signature of one flat (Bb) and contains a whole note C. The eighty-first staff has a key signature of one flat (Bb) and contains a whole note C. The eighty-second staff has a key signature of one flat (Bb) and contains a whole note C. The eighty-third staff has a key signature of one flat (Bb) and contains a whole note C. The eighty-fourth staff has a key signature of one flat (Bb) and contains a whole note C. The eighty-fifth staff has a key signature of one flat (Bb) and contains a whole note C. The eighty-sixth staff has a key signature of one flat (Bb) and contains a whole note C. The eighty-seventh staff has a key signature of one flat (Bb) and contains a whole note C. The eighty-eighth staff has a key signature of one flat (Bb) and contains a whole note C. The eighty-ninth staff has a key signature of one flat (Bb) and contains a whole note C. The ninetieth staff has a key signature of one flat (Bb) and contains a whole note C. The ninety-first staff has a key signature of one flat (Bb) and contains a whole note C. The ninety-second staff has a key signature of one flat (Bb) and contains a whole note C. The ninety-third staff has a key signature of one flat (Bb) and contains a whole note C. The ninety-fourth staff has a key signature of one flat (Bb) and contains a whole note C. The ninety-fifth staff has a key signature of one flat (Bb) and contains a whole note C. The ninety-sixth staff has a key signature of one flat (Bb) and contains a whole note C. The ninety-seventh staff has a key signature of one flat (Bb) and contains a whole note C. The ninety-eighth staff has a key signature of one flat (Bb) and contains a whole note C. The ninety-ninth staff has a key signature of one flat (Bb) and contains a whole note C. The hundredth staff has a key signature of one flat (Bb) and contains a whole note C.

73 ... Percussion

Three types of percussion staves: A five-line staff with bass clef for Timpani, a five-line staff with percussion clef, and a one-line percussion staff with only unpitched notes.

73a-Percussion.xml

74 ... Figured bass

Some figured bass containing altered figures, bracketed figures and slashed figures. The last note contains an empty <figured-bass> element, which is invalid MusicXML, to check how well applications cope with malformed files.

Note that this file does not contain any extenders!

74a-FiguredBass.xml

75 ... Other instrumental notation

All possible accordion registrations.

75a-AccordionRegistrations.xml

90 ... Compressed MusicXML files

A compressed MusicXML file, containing a simple MusicXML score and the corresponding .pdf output for reference.

90a-Compressed-MusicXML.mxl

Compressed MusicXML le

99 ... Compatibility with broken MusicXML

Dolet 3 for Sibelius (5.1) did not print out any closing beam tags, only starting and continuing beam tags. For such files, one either needs to ignore all beaming information or close all beams

99a-Sibelius5-IgnoreBeaming.xml

If we properly ignore all beaming information from the Dolet 3 for Sibelius export file, make sure that the lyrics syllables are still assigned to the correct notes.
